- (ii) Other commodities derivatives and emission allowances derivatives

## **Contracts for difference**

## **Exchange traded products (Exchange traded funds, exchange traded notes and exchange traded commodities)**

## **Emission allowances**

## **Other instruments**

The execution venues the firm used are well known market providers with significant experience and solid reputation, the practice of their execution in the said year confirmed that they provide their services in speedy manner (no significant delays in execution) with high likelihood of execution (100%), without any hidden costs and with competitive prices for their services.

The Company has had no closed links with the providers, conflicts of interests related to business cooperation with the execution venues, or common ownerships with respect to any execution venues used to execute orders.

The Company has no specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits.

**The list of execution venues has been updating during the year.** The client categorization did not affect order execution.

No criteria has been given precedence over immediate price and cost when executing retail client orders.

As Delegated Regulation (EU) 2017/575 (RTS27) entered into the force on 3 January 2018 no relevant data relating to the quality of execution has been published by the execution venues under that regulation during the year 2017 and thus the Company could not use it to assess the quality of execution.

The Company has not used the services of entities collecting trade reports and consolidating them into a continuous electronic live data stream providing price and volume data per financial instrument (consolidated tape providers) as no EU consolidated tape has emerged.

Conclusions: the choice of execution venues made by the Company is based on commercially sound grounds and promotes the best interest of the clients to the extent possible to the Company and no corrections need to be made.
